DETERGENTS / SANITIZERS

USE:

Maintenance of the physiological properties of the hooves of sheep, goats, cows and horses.

MODE OF USE:

PREVIO® PDR should be mixed with water at concentrations that range from 5 to 10%. Once mixed, the hooves of the animals should be submerged in the solution for several minutes, or the animals should be passed through baths or mats soaked in the product. The product should be applied at least once per week.

QUALITIES:

Persistence once diluted in water up to 5 days. Less toxic for animals and workers than formaldehyde. It includes a combination of sulfates with a great astringent effect.
