# ARPON<sup>®</sup>

## Actisan<sup>®</sup>

### INSECTICIDE DISINFECTANT

DOUBLE  
ACTION

PREVENTS  
DISEASES

INSECTICIDE

ARPON<sup>®</sup> Actisan is an emulsifiable concentrated liquid disinfectant and insecticide. It combines 3 disinfectant active ingredients that, together, exercise a very broad-spectrum disinfectant action against bacteria, viruses and fungi. Its insecticide action is due to the two pyrethroids in its composition. Its excellent compatibility with all kinds of materials make it a versatile product for the complete disinfection and disinfestation of livestock facilities as well as for the treatment of livestock transportation vehicles, veterinary clinics and slaughterhouses.

### DESCRIPTION:

ARPON® Actisan is an emulsifiable concentrated liquid disinfectant and insecticide. It combines 3 active ingredients that, together, exercise a very broad-spectrum disinfectant action. This action includes bacteria, viruses and fungi. The effectiveness of these three compounds, together with the action of its surfactant excipients, ensure an immediate and intense disinfectant action. Its insecticide action is due to the two pyrethroids in its composition.

### USE:

This disinfectant and insecticide is suitable for all types of livestock facilities and transportation vehicles. It acts effectively and persistently after a single application.

### MODE OF USE:

The biggest advantage of ARPON® Actisan is its ability to disinfect and disinfest in a single application. Therefore, to achieve appropriate hygienic and sanitary conditions, it is only necessary to follow two steps:

- The prior cleaning of the facility to be treated.
- The subsequent application of the appropriate dilution of ARPON® Actisan.

It can be used on all types of surfaces, either by brushing or by spraying, and it is equally effective in both ways.

This product is suitable for terminal disinfection and disinfestation of facilities (aerial disinfection). It can also be used for cattle disinfection baths. The product must not be applied in the presence of animals. The product is applied at concentrations that range from 1% to 0.25%, depending on the desired effects.

### PROPERTIES:

ARPON® Actisan is a disinfectant and insecticide with highly effective active ingredients. It saves time and manpower by unifying disinfection and disinfestation. It has a broad spectrum that includes all types of bacteria, viruses, fungi, spores, insects and mites.
