## Plus<sup>®</sup> PWD

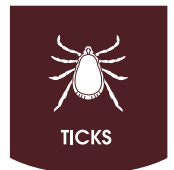

## INSECTICIDE POWDER

FLEAS

COCKROACHES

TICKS

LETAL<sup>®</sup> PLUS PWD is an effective powder insecticide and acaricide that contains Deltamethrin and Cypermethrin, two powerful active ingredients that can effectively eliminate all types of crawling insects and mites. The field tests conducted show that it is an essential product to be included in a red mite eradication program in poultry premises, since the Deltamethrin/Cypermethrin combination provides an excellent repellent action with residual effectiveness of up to 6-8 weeks. Thanks to its powdered form, it can be easily dispersed both in manual and machine operated applications.

— USE IN LIVESTOCK FARMING —

The efficacy you need.

**LETAL****Plus PWD****DESCRIPTION:**

LETAL® PLUS PWD is an effective powder insecticide and acaricide that contains Deltamethrin and Cypermethrin, two powerful active ingredients that can effectively eliminate all types of crawling insects and mites. It is the product of choice in all types of livestock premises to eliminate fleas, ants, cockroaches, etc., and also for ticks. The field tests conducted show that it is an essential product to be included in a red mite eradication program in poultry premises. Thanks to its powdered form, it can be easily dispersed both in manual and machine operated applications.

**MODE OF USE:**

Apply the product evenly with the aid of a sprinkling machine, using 6 g of product (equivalent approximately to a teaspoon) per square metre. Repeat when necessary, when changing bedding or directly onto bedding every 10-15 days. During storage, the product may become compacted. This does not alter its effectiveness. In the case of high levels of red mite or alphetobius infestations, double or triple the dose, i.e., between 12-18 g per square metre. Repeat the treatment at the routine dose of 6 g/m<sup>2</sup> after one month, and then every 10-12 weeks. Apply the product when changing bedding or directly onto bedding.

**REGISTRATION No.:** 02322-P**COMPOSITION**

Deltamethrin	0.2%
Cypermethrin	0.1%
