PARASITAL[®]

Lotion

ANTIPARASITIC PETS, HORSES AND BIRDS

PARASITAL[®] Repellent Lotion is an antiparasitic product for dogs, companion animals and horses. It contains a fixative ingredient to attach the product to the animal's hair, thus protecting it for 15 days against insects and external parasites.

It has laboratory tested effectiveness, providing excellent results, and it is easy and safe to use.

It repels the Phlebotomine mosquito, thus preventing Leishmaniosis in dogs.

DESCRIPTION:

Thanks to its composition, based on natural active ingredients, the PARASITAL® repellent lotion is effective against external parasites. It is effective against ticks, fleas, flies and the mosquito that transmits Leishmaniosis. These insects will therefore no longer be a problem, providing well-being and peace of mind to pets and owners alike.

INDICATIONS:

The products that are part of the PARASITAL® range are suitable for eliminating the discomfort caused by insects and mites, a common problem in the life of our pets.

With high repellent power and endurance, the PARASITAL® repellent lotion will look after your pets in a natural fashion. Independent approved laboratories guarantee the extraordinary effectiveness and endurance of the active ingredients.

Experimental studies have also demonstrated their repellent effectiveness against Phlebotomus mosquitoes, which transmit Leishmaniosis.

PARASITAL® provides the necessary degree of comfort and well-being, making the daily life of the animal and its owner much easier.

The PARASITAL® repellent lotion can be used to fend off attacks against animals by fleas, ticks, flies and mosquitoes.

MODE OF USE:

Spray the animal the recommended number of times at a distance of around 20-30 cm:

- For small dogs: 4 applications.
- For medium sized dogs: 6 to 8 applications.
- Big dogs: 8 to 10 applications.
- Sheep and goats: 9 to 11 applications.
- Horses and cows: 10 to 14 applications.
- Birds: 1 application on the back or 2 under the wings, depending on the size of the bird.

After application, the PARASITAL® repellent lotion protects against insect bites for 7-10 days. The repellent lotion can also be sprayed onto the dog bed or house, to repel insects from this area.

Do not apply to cats or animals under two months. Spray at a distance of around 20 cm from the animal.
