CLEANER WITH QUATERNARY AMMONIUM

LIVESTOCK
HOUSING

FOAMING

HA
FOOD
INDUSTRY

Concentrated foaming alkaline detergent that is chlorine-free, suitable for cleaning livestock facilities and for use in the food industry. It is particularly effective at eliminating the organic matter attached to the surfaces to be treated. For foam applications, use a low-pressure foam machine or a foam lance, at 2%.

— USE WITH LIVESTOCK AND THE FOOD INDUSTRY —

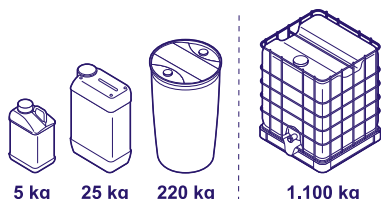

The efficacy you need.

COMPOSITION

Sequestering agents and polycarboxylates	<5%
Alkyl benzyl dimethyl ammonium chloride	1%
Sodium hydroxide	5%-15%
Amphoteric surfactants	<5%
Non-ionic surfactants	<5%
Excipients q.s.p.	100%

DESCRIPTION:

PREVIO® Quat is a chlorine-free foaming alkaline detergent. It is a concentrated detergent with high degreasing power, specifically designed for the routine cleaning of all types of livestock facilities and for use in the food industry.

PREVIO® Quat eliminates residual organic matter, grease and all types of dirt thanks to its tried and tested formula, which combines non-ionic, anionic and amphoteric surfactants.

USE:

Due to its versatility and cleaning capacity, PREVIO® Quat is suitable for livestock facilities, transportation vehicles, premises of all types and for cleaning surfaces and utensils in the food industry. The product can be applied through brushing, immersion, spraying or by using pressure cleaning machines. Advantages:

- By applying PREVIO® QUAT, cleaning and disinfection is more powerful and long-lasting.
- The use of PREVIO® QUAT helps to reduce the consumption of water and disinfectant, while optimising the level of disinfection obtained.

MODE OF USE:

PREVIO® Quat is used diluted in water to concentrations that range from 0.5%-3%, depending on the level of dirt. In particularly greasy areas, the concentration can be increased or, occasionally, the product can be applied in its pure form, if necessary. The product is applied by spraying, brushing, washing or immersion. It can also be used with foam lances at a concentration of 2%. After leaving it to act for several minutes, rinse the surface with water or a damp cloth. After this, the virucidal disinfectant SANITAS® can be applied to obtain the full disinfection of the facilities or utensils.

con agua o un trapo húmedo. Tras esto, puede aplicarse el desinfectante viricida SANITAS para obtener una desinfección total de las instalaciones o utensilios.
