BIRDS

PRODUCT
100%
NATURAL

ZOTALIN® cat litter is a completely natural mineral-based product in granular form, which is dust-free. It absorbs liquids rapidly, preventing the formation of bad odours. It is clean and hygienic, does not contain additives and is asbestos-free. It prevents the formation of germs in your cat's litter tray and, as it is a neutral product, it protects the skin of animals, thus being ideal for the health of your pet.

PRODUCTS FOR PETS

DESCRIPTION:

ZOTALIN® cat litter is a completely natural mineral-based product in granular form, which is dust-free. It absorbs liquids rapidly, preventing the formation of bad odours.

Our cat litter is clean and hygienic, does not contain additives and is asbestos-free. It prevents the formation of germs in your cat's litter tray and, as it is a neutral product, it protects the skin of animals, thus being ideal for the health of your pet.

It can also be used as litter for dogs and birds, and in garages and workshops to absorb and clean spills of oils and other liquids. It can be used in refrigerators to prevent bad odours, and in bins to absorb liquids and prevent odours.

INSTRUCTIONS, RECOMMENDED DOSES AND MODE OF USE:

For cat litter:

1. After having cleaned the tray or usual container, add a layer of ZOTALIN® cat litter, of around 5 cm.
2. Remove dried faeces on a daily basis and move the litter around.
3. Change the whole content of the tray at least once per week, or before if it smells of cat urine or if the animal shows signs of rejecting to use the tray.

For puppy litter:

Add a layer of around 2-3 cm of ZOTALIN® cat litter into the tray, removing dirty areas on a daily basis.

For birds:

Place a layer of ZOTALIN® cat litter on the bottom of the cage, changing it when dirty. As use of a grate is not necessary when using a layer of ZOTALIN® cat litter, this will be beneficial to the birds' feathers.

Garages and workshops:

Spread ZOTALIN® cat litter onto spills of oil or other liquids.

Refrigerators:

Place a small container of ZOTALIN® cat litter and change it frequently.

Bins:

Place a thin layer of ZOTALIN® cat litter in the bin and change on a daily basis. It absorbs liquids and prevents bad odours.
