ARPON[®]

Dual

INSECTICIDE DISINFECTANT

ARPON DUAL is a water emulsifiable disinfectant and insecticide concentrate in liquid form. It combines 4 disinfectant active ingredients that together perform a broad-spectrum disinfectant action against bacteria, virus and fungi. Its insecticide action is due to the pyrethroid of its formula. Its excellent compatibility with all kinds of materials makes it a versatile product for the complete disinfection and insect removal of livestock and poultry facilities, as well as to treat transport vehicles of animals, veterinary clinics and slaughterhouses.

DOSING: It is used diluted at 0.5-2%.

INSECTICIDES

PROPERTIES AND INDICATIONS:

ARPON DUAL is a liquid insecticide emulsifiable in water. It combines 4 active ingredients (Glutaraldehyde, Didecyl Dimethyl Ammonium Chloride, Alkyl Dimethyl Benzyl Ammonium Chloride and Glycolic acid) which combined perform a broad-spectrum disinfectant action against bacteria, virus and fungi. The high penetration capacity of these four components together with the action of the surfactants of its excipients assure an immediate and intense disinfectant action even in the presence of organic matter. Its insecticide action is due to the cypermethrin. This pyrethroid is exceptionally effective against all kinds of insects and mites, such as flies, mosquitoes, cockroaches, fleas, ants, spiders, ticks and others. Its excellent compatibility with all kinds of materials makes it a versatile product for the complete disinfection and insect removal of industrial warehouses, premises, buildings and facilities used for livestock, poultry (broilers, layers, breeders and hatcheries) and rabbit farming, dog kennels and other facilities which house animals. It can also be used in the disinfection and insect removal of machinery and equipment, as well as for the treatment of animal transportation vehicles, veterinary clinics (areas destined for animals, hospitalization cages, etc.) and slaughterhouses (animal stabling area).

PRESENTATION:

ARPON DUAL is available in containers of 250 ml, 1 L, 5 L, 25 L and 200 L. (includes measuring cap).

APPLICATIONS:

Effective and persistent disinfection and insect removal of all kinds of premises and animal transport vehicles, in one single application.

INSTRUCTIONS FOR USE:

The major advantage of ARPON DUAL is its capacity to disinfect and disinfect in one single application, so to achieve the appropriate hygiene and sanitation conditions only two steps are required, the initial cleaning of the facilities to be treated and the application of the appropriate dilution of ARPON DUAL. It can be used for all types of surfaces, either by rubbing or spraying, both ways being equally effective. The product can be used for the terminal disinfection and insect removal of premises (aerial spraying). It can also be used in sanitary areas. To disinfect/disinfect surfaces (by brushing or spraying), the product can be applied in the presence of animals, avoiding spraying the product directly onto them. If the treatment is applied by nebulisation, animals must be removed from the premises and can be returned when the walls have dried off. The product is applied at dilutions ranging from 0.25% up to 1%, depending on the desired effects.

QUALITIES:

Highly effective active ingredients. Saves time and labour as it unites the disinfection and insect removal tasks. Broad-spectrum that includes all kinds of bacteria, viruses, fungi, spores, insects and mites.

REGISTRATION No.: 01699-P

USE BIOCIDES SAFELY. ALWAYS READ THE LABEL AND PRODUCT INFORMATION BEFORE USE.
